## STATE EARLY CARE and EDUCATION (ECE) PROFESSIONAL DEVELOPMENT WEB SITES

Comprehensive professional development systems for early care and education personnel are accessible and based on a clearly articulated framework; include a continuum of training and ongoing supports; define pathways that are tied to licensure, leading to qualifications and credentials; and address the needs of individual, adult learners. Enhancing a spirit of life-long learning is one goal of any professional development system; similar to this goal, a professional development system itself is never a finished product and should continually evolve and be refined to best meet the needs of the population it serves.

Within professional development systems are several interconnected components. These components fall under five broad elements: 1) Funding; 2) Core Knowledge; 3) Qualifications and Credentials; 4) Quality Assurances; and 5) Access and Outreach. A one-page document that outlines and defines this simplified framework is available on the Web at <http://nccic.org/pubs/goodstart/pdsystem.html> or in PDF format at <http://nccic.org/pubs/goodstart/pdsystem.pdf>.

The following pages include links to State ECE professional development Web sites. The table highlights information provided on professional development system elements and components; other general professional development and ECE information and resources may also be provided via the listed Web links.
